Short HOWTO for Template of Theses' Cover

In order to keep the design of all submitted theses similar-looking, proposed layout must be followed, including all the information. This is ensured when binding is done at this company: Powerprint, Zikova 19. Binding may be done at any other business. In that case, the correct look of the cover is in your responsibility. Note these possible issues:

- all the proposed information must be included in correct order and letter case:

    1. NAME OF THE UNIVERSITY AND FACULTY,
    2. CTU logo,
    3. thesis' title,
    4. THESIS' TYPE,
    5. year & first name and SURNAME incl. academic degrees;

- font, especially metrics (size, width),

- exact layout.

Shelf back should include information in the following format:
year (left)   TYPE OF THESIS (centre)   Name and SURNAME (right)
Use this template with LaTeX 2e (TeXLive 2010 recommended).

1   Bachelor's Thesis

Select file by colour:

- `coverBachelors-inverse_colours` for preview, look close to result,

- for print preview use rather `coverBachelors-bw`.

To create preview with your data, select source file named as above and use pdflatex command to process it.

2   Master's Thesis

Select file by colour:

- `coverMasters-inverse_colours` for preview, look close to result,

- for print preview use rather `coverMasters-bw`.

To create preview with your data, select source file named as above and use pdflatex command to process it.
